EDMC

Dear Mr. Downey:

REQUEST FOR POLYCHLORINATED BIPHENYL RISK ASSESSMENT FOR THE
MOBILIZATION OF SINGLE-SHELL TANK SOLID WASTE APPROVAL CONDITION
CHANGE REQUEST FOR 241-C-102, 241-C-104, 241-C-107, 241-C-108, AND 241-C-112

Reference: EPA letter from M. A. Bussell to R. J. Schepens, ORP, "Approval of the Toxic
Substance Control Act (TSCA) Risked-based Disposal Approval (RBDA)
Application for the Mobilization of Single-Shell Tank Solid Waste Using Double-
Shell Tank Supernate – Phase II Approval for Tanks 241-C-102, 241-C-104,
241-C-107, 241-C-108 and 241-C-112 and Amended Phase II Approval
Conditions for Tanks 241-C-103/109," dated June 1, 2006.

The U.S. Department of Energy (DOE), Office of River Protection in accordance with
Condition 8 of Reference 1 is requesting a change to the schedule specified in the C-102 Series
Phase II conditions. The specific Phase II condition we would like changed is Condition 3 which
requires a formal waste compatibility assessment. DOE would like an extension to the date to 7
days, rather than the current 5, as indicated in the 30 day schedule. This change in Condition 3 is
necessary to ensure the information related to source and/or receiving tank information provided
in the Waste Compatibility Assessment are current at the time of retrieval.

If you have any questions, please contact me, or your staff may contact Mary Beth Burandt,
Office of Environmental Safety and Quality, (509) 372-7772.

Sincerely,

Roy J. Schepens, Manager
Office of River Protection
